

## Allergen Information

We supply all our customers with handy stickers for the back of our pump clips and keg lenses so that all pub staff and other customers can be fully aware of the allergens in our ale. Allergens in our bottled beers are clearly displayed on the labels.

Basic facts on the most likely allergens you might find in beer..

**GLUTEN** is found in malted barley, wheat, rye, and other cereals. In a traditional brewing process, any gluten is largely broken down. All our beers contain some Gluten.

**SULPHITES** None of our ales contain reportable amounts of sulphites under the regulations.

**ISINGLASS** is a clarifying agent used in most cask beers and in many bottle and keg beers. Whilst isinglass is derived from fish it is not considered an allergen owing to the careful cleaning process followed by the suppliers we choose. Our Saison does not use any isinglass and is suitable for vegans.

	CONTAINS GLUTEN (WHEAT)	CONTAINS GLUTEN (BARLEY)	CONTAINS SULPHITES	CONTAINS ISINGLASS
